Advanced Lab Course

Advanced Lab Course (Master-Fortgeschrittenenpraktikum I/II)

Introductory Meeting & Safety Briefing

Winter Term 2022/23

Tim-Oliver Husser
Institute for Astrophysics and Geophysics

(Slides mostly by Thomas Kurz)

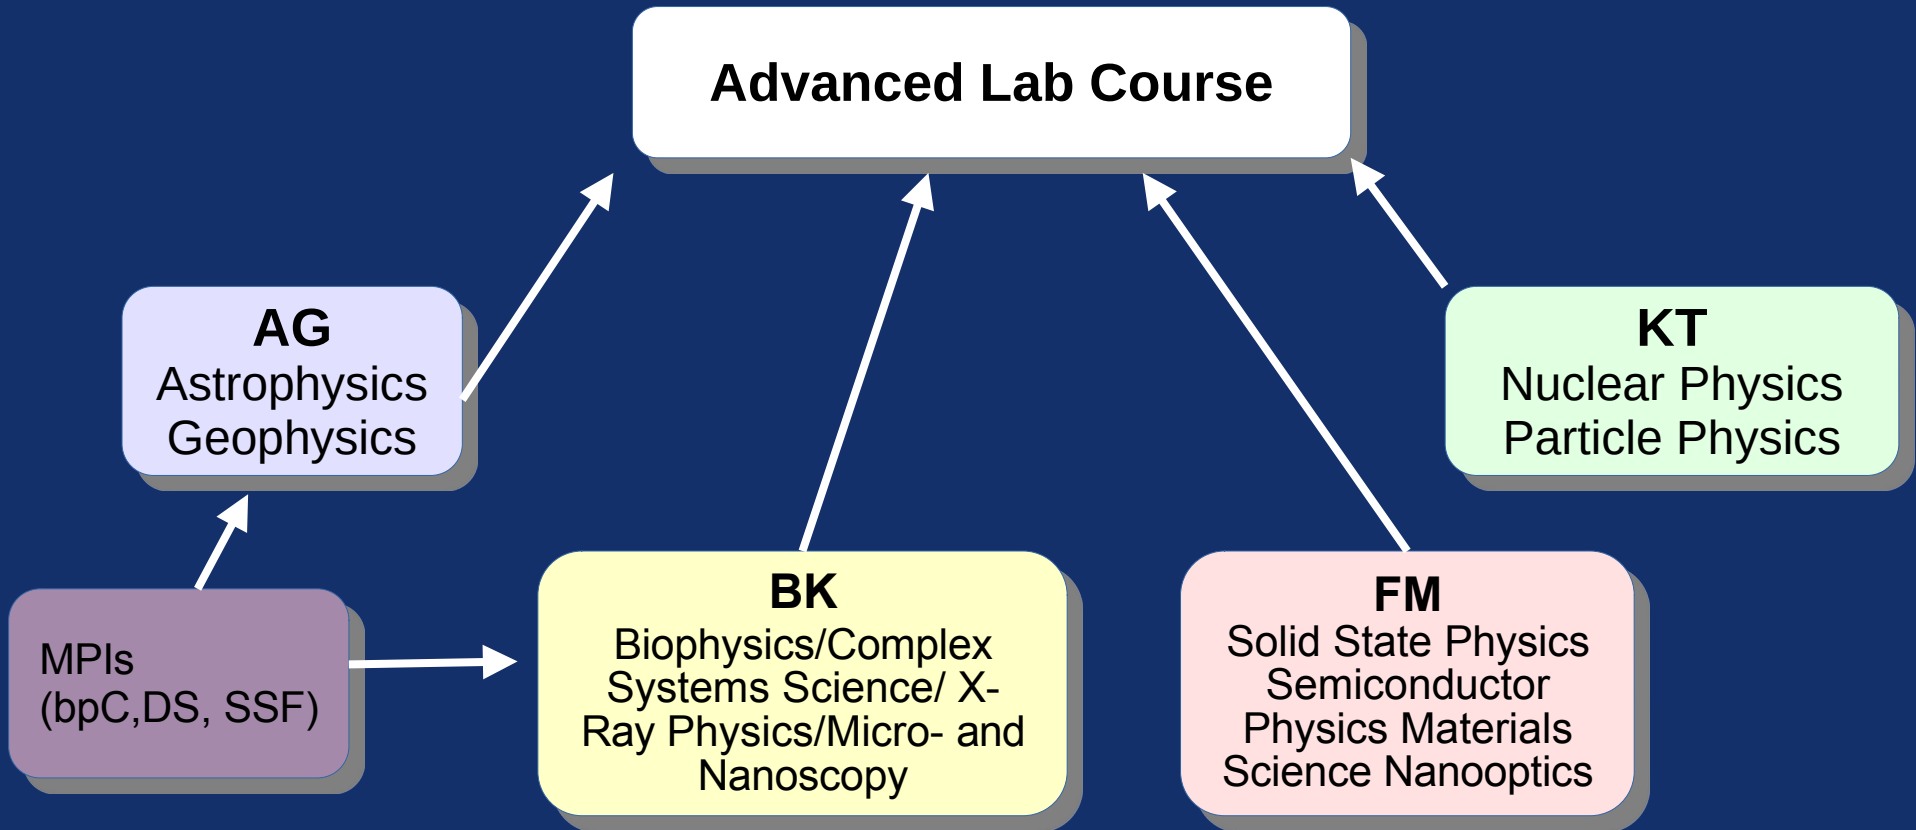

thusser@uni-goettingen.de
[@thusser](https://www.instagram.com/thusser)

General Information

- ALC has two parts (1 and 2) either part can be conducted in summer or winter term
- [Part 1: module M.Phy.1401](#) is a required course, usually completed in the first semester of the Master program
- [Part 2: module M.Phy.1402](#) is an elective course, usually completed in the second semester of the Master program

Part 2 can be substituted by certain other courses (Internship, Electronics Lab)

General Information

- per Part/Module: 4 Labs – 6 hours/week (SWS) – 6 CP
- Experiments usually done by teams of two
- Web page:

<https://advanced-lab-course.physik.uni-goettingen.de>

provides ...

- all information on organization of the ALC
- online schedule and assignment of Labs
- abstracts/descriptions of the experiments offered
- instructions

General Information

- contact persons/persons in charge
 - questions on experiments, appointments
 - **Tutors**
 - Questions on the oral exam
 - **Examiners**
 - questions and constructive critics concerning the organization of the ALC
 - **Organizer**

Registration

- Registration for exam via FlexNow:
 - M.Phys.1401.Ex: Advanced Lab Course I - Experiments
 - M.Phys.1402.Ex: Advanced Lab Course II - Experiments
- Examination date*:
March 31, 2023

**Please register (or cancel) in time.
Registration after the deadline is not possible!**

* This is a formal date. You should have conducted your Labs by then but it is **not required** that oral examination is already taken

Registration

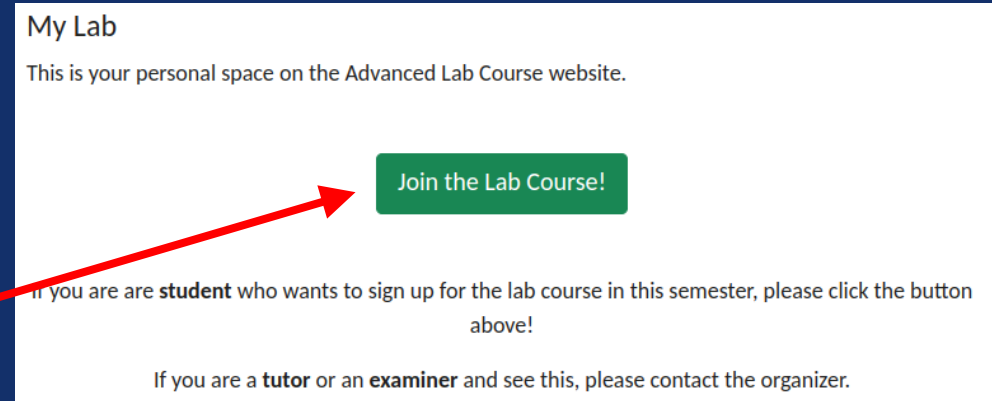

- Register on ALC website
<https://advanced-lab-course.physik.uni-goettingen.de>

NEWS DOWNLOADS CONTACT MY LAB

Account will only be activated AFTER safety briefing (see later)!

Remember

StudIP \neq FlexNow \neq ALC website

Register on ALL THREE!

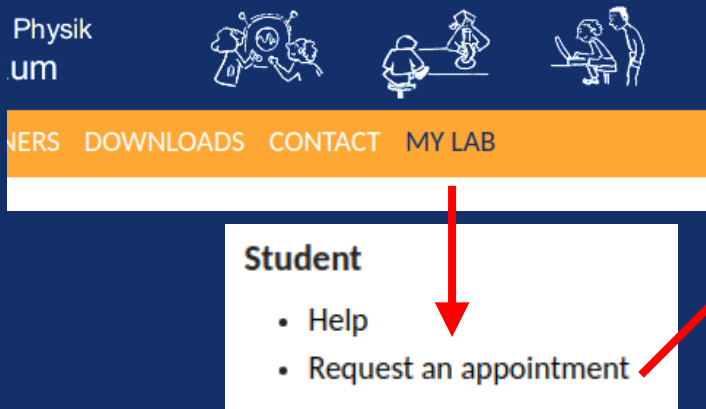

Course of actions

- sign in for Labs online or make appointments directly with the tutor. This is possible during the whole semester.
- download the **instructions** (login required)
- **contact the tutor** at least one week in advance (mandatory). The tutor will give hints for preparation and additional literature, if available
- **prepare** yourself thoroughly (theory)
- conduct the experiment. In general, Labs take place on **Wednesdays, 09:00-17:00**
- write the report (submission **deadline: 2 weeks** after the Lab)

Lab assignments

- are self-organized, usually 'first come, first served'
- Login required, need to have joined for current semester
- use request form to sign in for a lab

Experiment: AG.CCD - Astronomical CCD Calibrations and Observations

Date:

Lab partner:

(Lab partner 2):

Comment:

You will be contacted when the appointment is created (or denied).

Lab assignments

- Alternatively you can send an **email to tutor**. Has to be done for appointments outside of lecture period.
- When the appointment is created, you can see it on your **MyLab** page:

Upcoming labs		
Date	Experiment	Students
Sept. 30, 2022	AG.CCD	A. Student , B. Student

- Now you should contact the tutor for information about the lab and start preparing for it.

Lab assignments

- **Teams of three** are possible, but should remain an exception please ask the tutor or the organizer
- you can **fail** a lab
 - in case of absence without reason
 - if you are ill-prepared
 - If your report is not accepted
- in case of **failure**:
 - make a new appointment with the tutor (same experiment) or take another lab

Instructions, Preparations and experimental work

- download the **instructions** (login required)
- in case that the online instructions are (still) missing or an English version is not yet available but needed:
 - ask the tutor for assistance
- **Preparation:**
 - work out the required theory
 - read recommended references
 - answer questions that are posed in the instructions
 - the description of the relevant theory is (the first) part of your Lab report

Experimental work

- location of the Lab: see ALC web site or ask the tutor
- please show up in time
- starts with a discussion of the experiment and explanations by the tutor, possibly including special safety instructions,
this is the opportunity to ask questions and clarify things!
- Presence of the tutor required in case of possibility of personal safety hazard operation of expensive equipment
- in case of uncertainty or doubt:
 - Do not hesitate to ask
 - try common sense

Lab protocol / notes

- **document** the course of your experimental work.
Note down
 - all relevant data
 - instrument settings
 - experimental steps and procedures
- tables of measured values:
hand-written record, or electronic spreadsheet, attach a printout to your report
- the Lab protocol is an **important part** of your report

Lab report

- For each Lab a **written report** has to be submitted (= practice of scientific writing)
- reports are returned to you after being accepted
- every student has to **submit their own report**, prepared independently and formulated with their own words, except for
 - the Lab protocol
 - figures and calculations used in the analysis of the results (team work)

Lab report

- Length: **≈10 pages of text** (without figures and the protocol)
- structure:
 - 1) cover sheet and a Lab record sheet
 - 2) abstract, summarizing the goal of the experiment (~ 0.5-1 page)
 - 3) theory part (concise, ~ 3-4 pages) answers to questions, if required
 - 4) description of experimental procedure (related to protocol)
 - 5) Analysis and interpretation of results, including error analysis and discussion (~5-6 pages)
 - 6) Lab protocol (original or photocopy)

Lab report

- Formal requirements:
 - hand-written or created with word-processing software LaTeX, Libreoffice, Word ... (templates available for download), Font size ≥ 10 pt
 - please use the standard cover sheet, attach Lab record paper sheets should be firmly stapled together
 - please do not use spiral binding or plastic folders prefer recycling paper
 - **electronic submission should be default**

Lab report

- requirements with regard to form and content:
 - text clearly structured and logically presented (with sections, subtitles)
 - concise and focused presentation
 - please observe orthography and punctuation
 - figures and diagrams of appropriate size and scaling, well-readable axis labels and legends
 - numbered equations
 - numerical values rounded according to precision of measurement
 - use of SI units, unless otherwise stated

Lab report

- Language of the report: English or German (upon tutor's consent)
- Submission deadline: 2 weeks after the Lab (extension is possible if approved by the tutor)
- In case that revision is required use version numbers
- attach all previous versions of report upon resubmission

Lab record

- Can be used for tracking your labs.
- But **not required** anymore!
- Done via ALC website now.

Lab record

Please attach a copy of this form to each submitted report.
Keep the documents safe. They are needed for admission to the oral examination.
Please fill in required information with print letters. Shaded areas are reserved for tutors/examiners

A. Personal Information

family name
first name
matriculation number
email

B. Lab

acronym-name of Lab	conducted on (date)
name(s) of team partner(s)	
name of tutor	name of examiner

C. Report

version 1	date of submission of original version	<input type="checkbox"/> accepted on <input type="checkbox"/> returned on (date)	signature of tutor
version 2	date of submission of first revision	<input type="checkbox"/> accepted on <input type="checkbox"/> returned on (date)	signature of tutor
version 3	date of submission of second revision	<input type="checkbox"/> accepted on <input type="checkbox"/> returned on (date)	signature of tutor

D. Statement of acceptance

Report accepted	date of signature	signature of examiner

- Report goes through the stages:
- Pending
 - Accepted
 - Finished

Crediting of external courses

- only possible for elective module M.Phy.1402
- **Substitution by another module:**
Internship, Electronics Lab
- **crediting of other accomplishments**
Lab courses abroad, Summer schools (CERN, DESY,...)
other experimental courses or practicals

Crediting of external courses

- requirements:
 - the external course is not credited against other modules or substituted for other courses
 - informal certification of a habilitated member of the faculty is needed with assessments (grade) of the achievement (should be submitted before the examination date)
 - written document (e.g., a report) on the course work

Oral examination

- requirement for admission to the examination (“**Prüfungsvorleistung**”):
 - Successful completion of **four labs per module**, which can be checked on the ALC website at any time
- For part 2 the number of Labs can be smaller when external courses are taken into account
- after having fulfilled the requirements, print out and fill in an **Examination Form**

Examination form

fill in

anymore!

examination
protocol, to
be filled by
the examiner

Organizing the oral exam

- choose a person from the list of examiners (on the website) who is entitled to carry out the final exam
- **get in touch** with this person early to get her/his approval
- after having obtained admission, find a suitable examination date with the examiner and define with her/him the possible subjects of the exam
- typically, these will center around the Labs you have conducted, and contents of external courses if applicable

Organizing the oral exam

- Please register exam on ALC website!

- AG.MWH - The Microwave Sky**
Lab date: 27/05/2022
Student(s): A. Student
Tutor: Advanced Tutor
Accepted: 31/07/2022
Report: 2022/22-AG.MWH-Student.pdf

[Add exam](#)

Organizing the oral exam

Register the exam on FlexNow!

- M.Phy.1401.Mp: Fortgeschrittenenpraktikum I
- M.Phy.1402.Mp: Fortgeschrittenenpraktikum II

Taking the oral exam

- date, time and location as appointed with the examiner
- duration: **30 minutes**
- language: German or English
- bring with you all of your Lab reports, including previous versions, or submit them beforehand (!!), as the examiner may want to have a look at them
- bring with you the **examination form**
- the signed examination form should be sent to the organizer immediately (usually done by examiner)

Evaluation and Feedback

- An evaluation form can be downloaded and submitted anonymously
- Constructive critics and ideas for improvement are welcome any time!
- Please report any possible errors, misprints etc in instructions or on the web site to the person in charge

Safety briefing follows...

- Safety guidelines can also be downloaded from the ALC web site
- Please acknowledge that you have taken part in the safety briefing and that you have taken notice of the safety advices by signing and returning the confirmation form
- **Without this signature you may not take part in the Advanced Lab Course!**
- For some Labs you may obtain additional specific safety instructions related to the specific hazards.

General precautions

- **do not work alone** in a possibly hazardous environment
- when personal hazards exist during parts of the experimentation, **the presence of the tutor is required**
- the use of **protective measures or equipment** is mandatory (e.g. protective wear, shields or safety goggles)
- inform yourself on **first-aid measures**: first-aid box, first-aid post, next doctor

Fire protection

- fire alarm system: in case of alarm
 - **leave the building immediately** (next escape way)
 - go to the meeting point outside the building
- if you discover a fire:
 - activate fire alarm box, push emergency stop
 - call 112, leave building
- small fires: use fire extinguisher
- **self protection has absolute priority**
- do **not** use elevators in case of fire

Radiation protection

- radiation control areas and restricted areas may only be entered by persons whose **exposition to radiation is monitored** (by dosimeter)
- For work with radioactive substances, the students will be **instructed by the tutor**, who is responsible for proper handling and shielding
- **Pregnant women** are not allowed to conduct an experiment involving radioactive samples

Electrical equipment

- In case of an accident with electricity:
 - push emergency stop immediately
 - do not touch anything or anybody beforehand!
- Persons affected have to be brought to the **emergency room** of the University clinic (UMG)
- prevention: do not use extension leads on the floor
- if you are uncertain or doubtful about the electrical wiring of an experiment: **please ask the tutor before switching it on!**
- This pertains in particular to experiments involving high voltages

Working with gases/liquid nitrogen

- Liquid nitrogen may only be transported or refilled under **supervision of the tutor**
- Never handle liquid nitrogen without **protective eye shield and gloves**
- Never handle liquid nitrogen in a closed room without **sufficient air circulation**
- In particular: **liquid nitrogen vessels must not be accompanied when transported in an elevator**

Working with chemicals

- ... is restricted to dedicated **chemical labs**
- work under the laboratory hood, if possible
- **be informed** about the potential hazards and health risks of the substances you are using
- wear **protective equipment** (gloves, glasses)
- take care of **proper disposal**
- label all vessels/flasks according to their contents
- clean and return the hardware you have used
- analogous procedures apply for biological material
