

Confirmation

Hereby I confirm to have participated in the initial Safety Briefing of the Advanced Lab Course offered by the Faculty of Physics of Göttingen University. I confirm to have taken note of and to have understood the general lab safety instructions, including the topics

- general safety precautions, usage of protective equipment
- behavior in case of fire
- hazards related to electrical lines and devices
- proper practice in chemical and biological labs
- handling of radioactive substances
- handling of liquid nitrogen

Furthermore, I confirm to have heard and understood the specific safety instructions concerning operation of lasers and handling of laser radiation, according to the regulations as formulated in the German "Unfallverhütungsvorschrift UVV Laserstrahlung", BGV B2 and GUV 2.20 b, including the topics

- properties and hazards of laser radiation
- effects of laser radiation on skin and eye
- laser classes and meaning of warning signs
- other possible hazards (fire, secondary radiation etc.)
- protection measures and instructions
- properties and utilization of protective eye wear
- behavior in case of laser malfunction and accident
